

FMIS FIELD SERVICE MANAGEMENT

Offline efficiency in the field with easy synchronisation

PAYROLL FLOWS

- Provides full timesheet records with both daily and team views
- Calculates allowances, advances, overtime and any bonuses as part of payroll extract
- Customisable extracts to ADP/ payroll systems

FINANCE FLOWS

- Posts time to finance systems such as Vision, requiring detailed timesheets
- Produces journals for expected pay burden
- Automatically creates expense forms within your finance system

PURCHASE FLOWS

- Allows requisitions to be raised in the field for the shipping of central stock/equipment or supplies
- Allows local purchasing to appear as commitment, subject to verification at head office
- Sub-contractors and regular purchases can be treated as blanket with controlled periodic limits
- Local goods receipt will be added to local inventory then synchronised with global inventory management
- Head office goods receipt for local purchases can be transmitted and shipped to local inventory

MAINTENANCE FLOWS

- Inspection reports collated and sent electronically
- Maintenance of local equipment still subject to head office stipulations
- Use of barcode scanner and digital pens to increase efficiency
- Work order production as a means of control

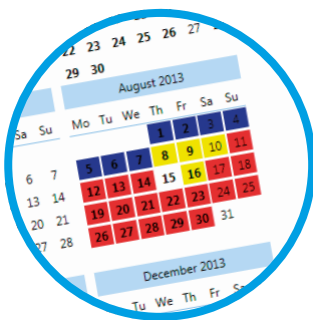

PERFORMANCE STATISTICS

- Full customisable production and performance measures can be provided as tailored project input templates for field administration
- Daily, weekly and periodic operational reporting provides a blend of performance indicators, plus time and expenses, for margin and KPI alerting
- Alerting of any exceptions within a particular days activity

GLOBAL DEPLOYMENT

- Easy version control and self-adapting updates for deployment
- Global view of all performance

Customisable daily production cost control and performance templates by job and team

Calendar for team timesheets in the field

Statistic/Qty	(Unit Cost)	Total	Phase	Task
Daily Number of	0.00			
Number of Extra	0.00			
Extra Personnel				
Per Unit Rate	0.00	0.00		
Extra Camp				
Per Day Rate	0.00	0.00		
Extra Motel				
Per Day Rate	0.00	0.00		
Extra Subsystem				
Per Day Rate	0.00	0.00		
Total = 0.00				

I have found the FMIS Purchasing system easy to learn and really effective in removing paper from our processing. The authorisation and workflow engine has made my life so much easier. The system is really easy to use, efficient and user-friendly.

Jamie Broughton, **Tesla Exploration International**

FMIS has provided a very flexible, easy to use and innovative set of solutions for our Seismic Field Operations. Time, Expenses, Rostering, performance statistics and full purchasing and inventory is now available in a very consistent manner cutting out swathes of paperwork we used to use. All of this is accessible in very remote locations with poor web connectivity. We have found FMIS to be a true innovator of solutions to our problems.

Tracy Bradshaw, **Tesla Exploration**

The FMIS team has been responsive and enjoyable to work with. FMIS has been collaborative and imaginative in developing solutions for requirements that have evolved during the project.

Michael Kiess, **Veteran Corps of America**

We were very pleased with how the FMIS project went and the support of the live system has been second to none.

Danny Mansfield, **Express Newspaper Group**
